

"The oldest crocodile eggs have been discovered in a dinosaur nest," according to a BBC News [article](#) published on March 9, 2017.

The article says *"this new discovery from Portugal extends the knowledge of this type of egg by approximately 40 million years."* It goes on to say *"the fossil record tells us that crocodiles and their relatives were much more diverse in the past."*

"Much more diverse in the past"? — That means that "evolution has gone backward," not forward, something it's not supposed to do! Or, maybe Darwinian macro-evolution hasn't occurred at all.

But notice what is also said: *"They are remarkably similar to the eggs of modern crocodiles, suggesting crocodile eggs have changed little in shape in the last 150 million years."*

'No change for 150 million years'? Really? Could it be that the Bible is true after all?

Crocodile eggs have changed little in shape in the last 150 million years

"Let God be true and every man a liar"
(Romans 3:4 LSB).

"And God said, 'Let the land produce living creatures according to their kinds: . . . the creatures that move along the ground, and the wild animals, each according to its kind.' And it was so. God made the wild animals according to their kinds . . . and all the creatures that move along the ground according to their kinds. And God saw that it

was good” (Genesis 1:24-25 NIV).

According to **Genesis 1:24-25**, God made untold numbers of creatures, **“all according to their various kinds” (REB)**, who would also reproduce **“after its kind” (NASB)**. So, small variations within each kind occurred, which is called Micro-evolution, but no wholesale changes from one kind to another have ever documented as occurring, even after many millions of years.

The more new scientific discoveries that are made over time prove the Bible to be true and Darwinian Macro-Evolution false.

“All flesh is like grass, and all its glory is like the flower of the field; the grass withers, and the flower wilts, but the word of the Lord remains forever” (2 Peter 1:24-25 NAB).
